Ahmad Banihani

Full Stack Developer

Amman, Jordan 0792119858 banihania91@gmail.com
linkedin.com/in/ahmadbanihani github.com/AhmadBanihani21

Profile

Results-driven and detail-oriented **Full Stack Developer** with strong experience in building scalable web solutions using **.NET Core**, **ASP.NET MVC**, and **Angular**. Demonstrates deep understanding of **OOP principles**, **software architecture**, and **database design**, delivering efficient and maintainable systems from concept to deployment. Proficient in developing RESTful APIs, implementing role-based authentication, and crafting responsive UIs with Angular. Passionate about producing clean, testable code and continuously improving software quality. Strong collaborator who thrives in agile teams and adapts quickly to new technologies and business domains. Dedicated to delivering software that solves real-world problems and enhances user experience.

Experience

Software Development Engineer

eSense Software *August 2024 – Present*

- Developing enterprise-level web applications using **.NET 8 Web API** and **Angular 17**.
- Implemented new modules and optimized existing features, ensuring scalability and high performance.
- Designed and consumed REST APIs with secure **JWT authentication** and role-based authorization.
- Improved frontend performance through lazy loading, reactive forms, and optimized change detection.
- Collaborated with QA, UX, and backend teams using Agile methodology to deliver sprint goals.
- Handled complex debugging and refactoring tasks, ensuring system reliability and maintainability.
- Actively participated in code reviews, mentoring interns, and maintaining Git-based version control.
- Enhanced user interfaces with dynamic data binding, filters, and reusable Angular components.

Software Development Intern

Tuned Applications *March 2023 – July 2023*

- Contributed to full-stack development using **ASP.NET MVC** and **SQL Server**.
- Assisted in building responsive UIs and integrating data-driven components with backend services.
- Enhanced system usability through structured database design and clean MVC implementation.

Software Development Intern

Tahaluf Al Emarat Technical Solutions *March 2024 – June 2024*

- Collaborated on large-scale systems using **ASP.NET Core Web API** and **Angular**.
- Implemented CRUD operations, modular components, and efficient front-backend communication.
- Assisted in debugging and resolving performance issues in deployed web applications.
- Gained strong practical experience in frontend frameworks, backend APIs, and team-based workflows.

Projects

- **Accounting Information System (2026):** GitHub Link
  Full-stack system built with **ASP.NET Core** and **Angular** using Clean Architecture. Implemented **multi-tenant architecture** with tenant isolation via JWT claims, secure **authentication and role-based authorization**, and a reusable **repository pattern**. Designed scalable REST APIs, global error handling, and Angular interceptors/guards for secure routing and request management.
- **Legal AI Assistant Website (3rd Place, TAHALUF AI Hackathon 2024):** GitHub Link
  AI-powered platform for summarizing and analyzing legal documents using Python and modern web technologies.
- **Loan Approval Prediction System (2023):** GitHub Link
  Machine learning model using Decision Trees to predict loan approval outcomes.

Achievements

- **3rd Place - TAHALUF GEN-AI Hackathon (2024)**
- Delivered multiple end-to-end systems integrating .NET and Angular.
- Recognized for problem-solving and high-quality software delivery.

Education

Jordan University of Science And Technology

Bachelor's: Computer and Information Systems (2020 – 2024)
GPA: **Very Good**

Skills & Knowledge

Programming: C#, .NET, Angular, JavaScript, TypeScript, SQL, Python
Backend: Web API, EF Core, LINQ, JWT, REST
Frontend: Angular, RxJS, Forms, Routing
Databases: SQL Server, PostgreSQL, MySQL
Tools: Git, Azure DevOps, Postman, VS Code, Visual Studio

Languages

Arabic (Native)
English (Fluent)
